- 1) Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC.
- 2) Commission Regulation (EC) No 1881/2006 of 19 December 2006, as amended, setting maximum levels for certain contaminants in foodstuffs.
- 3) It is not possible to assess compliance with the Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005, as amended, on maximum residue levels of pesticides in or on food and feed of plant and animal origin, amending Council Directive 91/414/EEC, because there are no specific concentration or dilution factors which are necessary to calculate maximum residue levels.
- 4) List of analysed pesticide residues with limit of quantifications is given in Annex List-F&V-L ed. III of 14.09.2020.
- 5) The lower limit of the measuring range of the accredited method, which is also the limit of quantification set by the Laboratory.
- 6) The measurement uncertainty is ± 50%, according to Sante/12682/2019.

Test: Pesticides - F&V - List L (GC) ed. III of 14.09.2020 was performed in laboratory with an accreditation number AB 1537

THE END OF THE REPORT

The results refer only to the samples received. When a measurement uncertainty is given, it is an expanded uncertainty estimated for a coverage factor $k=2$ at 95% confidence level and is not including sampling uncertainty, unless otherwise stated. When the conformity is stated J.S. Hamilton Poland Sp. z o.o. applies the simple acceptance decision rule in accordance with ILAC-G8:09/2019, unless otherwise reported. If the "result" column of the accredited method contains a record: "<" or ">", it means, that it is the test outcome directly related to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method respectively. In such a case, the Laboratory presents the opinion and interpretation in the "statement of conformity" column, which is based on the obtained test outcome.
